

Francesco Nasuti is a Professor in the Department of Mechanical and Aerospace Engineering and Director of Aerospace Research Center at Sapienza University of Rome, Italy. Dr. Nasuti received his M.S. degree in Aeronautical Engineering and Ph.D. degree in Aerospace Engineering from Sapienza University of Rome. He is a professor of rocket propulsion and leads a 12-person team of colleagues, PhD students and postdoctoral researchers called T(H)RUST (Thermal Rocket propUlsion: a Sapienza University research Team). His expertise is in theoretical analysis and numerical modeling in propulsion. His research topics include advanced rocket nozzles, liquid rocket propulsion systems, conjugate heat transfer, supercritical fluids in cooling

channels, combustion instability low-order modeling, hybrid rockets, and chemical reactions in gas surface interaction. He has authored more than 300 papers on these subjects. Dr. Nasuti is an Associate Fellow of American Institute of Aeronautics and Astronautics where is also a member of the Liquid Propulsion Technical Committee. He is Associate Editor for the Journal of Propulsion and Power of AIAA, and for the CEAS (Council of European Aerospace Societies) Space Journal. He is a correspondent of Air and Space Academy and a member of the Italian Association of Aeronautics and Astronautics (AIDAA).
